Meeting @August 22, 2026

Summary

Action Items

- [ ] Client to send a full list of services with relevant details by tomorrow night (Monday at the latest) ▸ ▸
- [ ] Follow up on the EPICS Construction booking that came through the website ▸ ▸
- [ ] Tinashe to send SEO pricing details and automation/AI integration costs ▸
- [ ] Tinashe to send invoice and banking details to the client ▸
- [ ] Fix spelling errors on the website (e.g. "practical") ▸
- [ ] Client to begin using Google Calendar in the interim to manually track bookings ▸ ▸

Website Status

- The HM Ock Health website is **already live** — the client was not aware of this, having assumed it was still a demo ▸
- Someone actually discovered and booked through the website via Google search at the end of June, confirming SEO value ▸ ▸
- The site covers two main areas: **occupational health** and **holistic wellness** ▸
- The company was originally registered as HM Health Clear (2019) but re-registered; the client prefers the new HM Ock Health name as "OC" is recognizable in the occupational health industry ▸

Management Portal

- A management portal exists at the bottom of the website, accessible via password ▸
- It provides an overview of website activity, pending bookings, and product management ▸
- The client was shown the portal for the first time during this meeting ▸

- A **calendar view** will be added to the portal to manage bookings ▸ ▸

Booking System & Calendar

- The agreed approach: clients **request** a booking online; the business receives a notification and confirms — clients do not see availability slots directly ▸ ▸ ▸
- This is important because time slots vary significantly depending on the type of medical (e.g. 10 basic medicals ≈ 30 min vs. 5 full medicals ≈ 2 hours) ▸ ▸
- The notification received upon a booking request will automatically indicate any calendar clashes ▸ ▸
- The client can also manually block out unavailable dates on the calendar ▸ ▸
- Long-term goal: direct all booking requests through the website rather than phone/WhatsApp ▸ ▸

Services & Products

- **Occupational health services** include: basic medicals, periodic medicals, exit medicals, drug tests, lung function (spirometry), audiometry, and special vision testing (for drivers) ▸ ▸ ▸
- **Wellness program**: a year-long holistic program (not weight-loss-pill-based), approx. R200/month, including blood pressure monitoring, health assessments, bi-monthly empowerment sessions (first aid, financial wellness), and Tai Chi/movement ▸ ▸ ▸
- The client has run a wellness program for 10+ years but has never formally launched it; the website is intended to help with this ▸ ▸
- **Induka natural products** (no parabens/sulfates) to be added as a **separate catalogue page**, linked to the wellness section ▸ ▸ ▸
- The venue can host wellness seminars for up to 50 people ▸

Pricing Strategy

- **Prices will NOT be displayed** on the website; the checkout/booking button will trigger a **quote inquiry** via WhatsApp or email instead ▸ ▸

- Reason: different companies are on different rates (ranging from R300–R350 for basics), and showing prices could allow competitors to undercut ▸ ▸ ▸

SEO & Add-On Services

- **SEO optimization** (separate from base website cost): registering with Google Search Console, keyword research, and baking keywords into the website content — helps the site rank higher in search results ▸
- A **blog page** was recommended as a further SEO booster — writing articles on wellness/health tips ▸ ▸
- Connecting the existing **Google Business Profile** to the website will also improve ranking ▸
- **Automation add-ons** discussed: auto-invoice generation upon booking, and an AI chatbot for 24/7 customer support ▸
- Auto-invoice was well-received — the client noted it removes the need to manually generate invoices at month-end ▸ ▸
- Chatbot considered especially useful for the **wellness** side of the business ▸ ▸

Email & Domain

- The existing email address will be kept — changing it was considered too disruptive ▸
- Email domain subscription is billed monthly; website domain is billed annually (cheaper overall) ▸

Payment Gateway

- Online payment integration (e.g. via Yoco or similar gateway) is a **separate future add-on** ▸
- The client expressed preference for client-controlled instant payments rather than debit orders ▸ ▸ ▸

Payment Arrangement for Web Services

- Monthly retainer to be paid on the **1st of each month** ▸
- The client prefers this over a debit order ▸

- Tinashe to send banking details and invoice amount ▸

Other Notes

- The recording continued well beyond the formal meeting and captured an unrelated VR gaming session (Tinashe's separate mobile VR entertainment business) and personal conversations — this content is not part of the HM Ock Health meeting

Notes

Transcript

Yeah, I think that would be a nice to have.

I don't know. Okay, so I think if I'm understanding you correctly, right, we do have different integrations as to what you just said. For example, probably you keep your data in a spreadsheet, right? So it would be possible to connect the website to a spreadsheet such that when someone books, that's automatically recorded on the spreadsheet. And also it could be linked to a calendar in a way that Like you said, a person can instantly know if there is an available portion or slot for the time or date that they want.

It's possible for that to happen automatically. Like I said, we do web design. We also do automation, meaning we automate processes automatically. admin processes generally so that you don't have to manually record certain stuff and so that just happens automatically right someone books it gets recorded to a spreadsheet you get a notification right so that's something we do separately right so i'm not sure if that's what you're asking yes no i'm that is something that i would for me yes

So, okay.

Even if mom, I know there's these budgets and all of that, but just to know that there is that option eventually because for me, digital must make life easier.

Yes. Yes, I agree. I really agree. It must make life easier.

There's no point in having something that's not going to make your life easier. It's going to be harder because now you have something else. on its own, but you're still doing manual things and now and then. Just think that you're causing a problem now because you don't go check the messages for one

email. But does this, that brings me to another question. This comes with email addresses as well. Or not?

Just the one email address. This website, would it have, and like a webmaster where it can be now, what is this, hm.ochealth at

Okay, so that is part of the domain, right? So you get a domain for the website and one for the email. But that comes with an extra cost, right? So the way they do it is they sell the one for the website, and if you want the one for the email, you have to pay a separate subscription. But now the difference is for the website domain, you pay... Every year with the email one you pay every month. Yeah, but it's a more cheaper per month Yeah, something like that But overall the website domain is cheaper.

Yeah.

Yeah. Yeah, but yeah, that is very possible I also did a Management portal where you guys see like Statistics and India. I'm not sure if I... Let me just check if I do have the login details. Okay, let me just look for the password. Okay, so there is more that could be added to the, okay, so are you on the website, on the laptop? Let me just set that down.

The pole one one.

You'll be confused now. Let me just go back there. Yeah? HM Health Clear.

Okay, it's like Patricia Anne said, it was HM Health Clear, but then you log in, you've got access to HM Ock Health. So originally the company was in 2019, so it was HM Health Clear. That's your resume. However, we defaulted with CIPC registrations or updates annually. And so... We spoke to, I'm not sure who we spoke to, it was actually just better to register a new company. And so I actually like the new company's name better than the old, because it is HMOC.

people in occupational health knows that is occupational health and then also the wellness part of it. I've added in there. Holistic wellness. And so there's the occupational health and section and then there is the wellness. So I'm going to do a talk at one of the quaddies probably next week. a week with regards to wellness. But I want to only to recruit my own clients for wellness seminars which we can host here.

So this venue, we have used, we've got it for about 30 years now. My two daughters stayed in the one and the family stayed in the main house, she stayed in the cottage at the back there and our extra income for the bond then was to do functions so we did quite a few functions but we've scaled down

dramatically on that so we do ... baby showers and small weddings and things like that. But we can accommodate up to 50 people in here, but you know the lounge suites go out and put up the catering tables.

But I'm not looking at such large numbers, because there has to be more close contact with the individuals where holistic wellness is concerned. So I would want that to actually stand out. almost more than the occupational health because we've never ever advertised all our clients are referrals and it's referrals because of good service so yeah so but my wellness program that i have for what more than 10 years i've actually never started with it i've got

You know, all my question is it's like a lose it for life program. It's holistic. It's not about taking certain tablets to lose weight and all that. It is just be real, you know. And so it's like a year program irrespective of when you started. You probably pay what, maybe 200 grand a month because I would be monitoring blood pressures and you know, other health issues and all that, but there would always be extras to that.

So as I said, where I'm now concerned is I could just never reach out. Number one, maybe because I didn't have the time or maybe I wasn't putting in the effort. But that is what I would like to retire with, so to speak. There's a lot of people

It is, you know, you see people say, oh look at this nice food that you can eat and all this and that and that and you can lose 5 kgs in a week and there's no exercise and all that.

Okay, you don't need to do exercise but you can do Tai Chi. You know, you have to do some movements. But it is, and then people stop and then they gain that weight again. And so it is... And there's a lot, it's not only about weight loss, there's a lot of stuff, there's emotional things, people have gone through trauma in the past and maybe it was ripped and now it is because you want to look unattractive, all that type of stuff.

So that is what I really want to start get going and I think the website

would probably help yeah do you have perhaps somewhere you like have a list of all of your services that you offer like with the relevant details to what everything involves i can i can i can send you something maybe by tomorrow night okay okay yeah because i really think it's best if that All of that is on the website. Because like I said, SEO optimization, right? So the thing is when Google looks at websites related to what you guys do, it like looks at content.

How much of that do you do? So is it detailed enough to help a person who is searching? So if there's more detail to what you guys offer, the more detailed the better so that we can include it on the website. Yeah. So...

No, no, I would definitely do that. And you know, it's like part of the package, just like for arguments like that, like 250 a month or 200 grand a month for a year or so. We've got, I mean, I'm a registered nurse, so technically... I should be almost be more trusted than some people who are just in wellness, you know, and they've got no medical skills and all that. Because I mean, I would do like a full medical on the client, which is included in that fee, you know, go to a doctor or somewhere else, you know, you're probably going to pay 400 or 500 Rand, you know, just for that.

But there's also, we did The two of us actually did first aid training. That was up to level 3 in the Sera that we did in PE. So I've got the whole first aid kits with the baby, the adult and the child. And once a month I would empower them free. They're not going to pay any extra for it, you know. Every second month there would be something that I would do with them, even from a financial aspect. How well you are working or not working, how you can save and how you can generate extra income and all that.

Don't be a monthly thing, it will probably be every second month, so maybe five times for the year, which would be for that same price that I would get.

Did you manage to log to go to the website? Okay, I just wanted to show you something.

Okay, I look lovely. They are so very young.

Okay, I think if... Let me just face this side. Okay. Okay, so there's this part at the bottom. It says... This part at the bottom, it says management portal. So this was my idea. Then I just put a password there.

So that is actually the first time that I'm seeing you.

So basically this is the idea. You get an overview of the website activity. For example, people who booked bookings that are pending. If you have products, you also manage your products here. So this was just a... Okay, there it is. Okay.

You were like, okay.

Okay.

Okay, so I think this has to go.

My money. Okay.

Okay, so yeah, this was basically the idea. So you just manage everything over here, right? So your bookings would be over here. So I noticed this morning when I was just looking at it, because I hadn't, because I see someone actually booked through the website, right? And then I had to find out where they did it. Then they did it via Google. They were actually looking for this and then they found it.

And what date was that? It was the end of June.

Not too far.

So this was just the one I did for testing. This one was actually real.

You must actually follow up on the EPICS construction.

EPICS construction, yeah. So these are the advantages of having a website optimized for Google.

I didn't realize it was actually live. I don't know why. If we have access to it, then obviously it should have clicked that it is actually live. I thought it was just a demo.

Well, at first it was. When did it go live? When I sent you the link, that's when it was. I see it live so that you can access it. So yeah, that's basically how you can log in, you can log out. So now this is a draft. You can basically suggest things that you would want to add. For example, a calendar. Right, you could maybe probably see overview bookings products calendar Well, like you could have a calendar to manage your bookings.

Okay, who's on what date? How many bookings are for that and that same calendar will probably be used like to see where certain slots collide So that people know when you are available and when you're not right. So yeah Yeah, this is basically that so Yeah So I'm not sure if you guys have anything that you want for...

What I would like is...

Okay, so just...

Sorry, just quickly.

You have only the... Okay, so through practical is a C short thing.

Okay, where?

Through practical is a C short.

P-R-A-C. Oh, yeah, I didn't see.

Don't worry, that's why we just did it. Of course, yeah, of course.

I don't know what you just said. B2B compliance and all. B2B compliance and all.

What were you just saying? Okay. Services.

Yeah. Can that basic medical periodic exit medicals Okay, but not so in detail maybe medical.

Which part?

This part? Yeah, that to be like we have now the occupational health medical, no? But then you can add drug test, lung function, whatever, maybe as a product so that we then know that is into the court maybe so that they can then already say that they want a drug test, 10 medicals drug test or they only need five drug tests and they need the hearing whatever maybe that can also be added to the court which would make it okay so so on the product yeah right so that you already know what they what they want exactly if they are willing to pay muslim just do the whole thing or the other thing is they could just ask for for for quote

They can ask for a code. Because it's like we've got the basics, the periodics and the exit. And not all companies do exits. I think it's like the quarries must do exits. But as you said, there's the lung function, the earing test and the vision that we can also do. So they must let us know. What and then the drug test too.

Okay, so how this basically worked was if I see Ed here, so I've got one thing. So you check out via WhatsApp. This is basically similar to like what you do, like sort of asking for a quote. You sing a one verse. Yes. Well, obviously the price is there already. But it's optional. You cannot put the price.

I think I would prefer not to have the price on.

Okay.

Yeah. I'll tell you why. Because currently all our clients are not paying the same fee. Okay. So what has happened is for years we were stuck at 250. It was without the tests and all that. And was it last year? No? Was it the beginning of this year? Eventually last year. One of our companies, they're an excellent group, so all the carpenters and all that, that fall under there, it is like just millionaires can buy there, but in any case.

So the health and safety officer lady said to me, she said to me, "Sister, your prices are just too low. We have done research, it is just too low." So in any case, I had pushed it up to 300, but then I pushed them up to 350 and they've got no problems whatsoever for the basic medical, you know. So the other clients are still sitting at mostly at 300 now. Would it be the person? Pardon? Is it a person?

Per person. Because it's everyone's blood pressure, it's your urine test, and it's your paperwork, it is your processing. There's other staff involved too that recheck and sign and all this and that. So there's quite a bit of a process. And then with a full medical, just for the lung function, test alone, the filter alone costs the T-RAN. you know, and in the years there's about 15 rang. But that's all besides the technician doing it, whether he's now the technician or whether he's now the technician or whatever.

So we had to empower the family to be able to do, because you obviously want to keep it in the family because the family needs money instead of, you know, resources and getting outsourcing. So I would prefer for the for the fees not to be paid on. We could just say as extra, and basically you can maybe just make that shorter too. There's a basic medical, the periodic. Periodic you don't really need to even put in technically because they know medicals need to be done every year.

That's like in construction. It's not like with the mines we have to do every three months because of what And then also we do spirometry, audiometry and special vision testing. The special vision testing is mostly for the drivers, like the truck drivers. Even if you're a driver, a Bucky driver, you actually need those tests. So they would rather than just ask me for a quote because as I said, there are some, it's like the one earlier, a few months ago,

He said, "Sister, still at 300, you can add a 25, if you want to make it 325." You know, if others are telling you, you know. So they all was on 325 and so I'm just gradually increasing it. I'm just feeling sorry for some of the people who have to pay themselves.

This is mine. This is mine. This is mine. This is mine. This is mine.

And then what was that? I don't know. You have your phone.

I just want to see what it's going to look like on mom's phone.

Okay, first it's going to open whoever's WhatsApp. This is. Yeah, you have it. So we baked a message into that button, like a template message. Okay, let me just show you if I click on that. I'm not sure if you have WhatsApp.

You can actually do it on there, just say open.

Okay, continue to WhatsApp.

It's fine, mom, it's not gonna come up here.

Okay, so I see it popped up here. Let me just transfer the screen to... Where is the mouse now? Okay. So it looks like this.

I know. It's fine, mommy. Okay, so that's what I want to see is that they can do that times eight and F. Okay, if mom doesn't want the...

Yeah, so I...

If I say, it will be a quote. Yes, yes.

So if she prefers... A person asking for a quote, we can just change this message to be like, be such that it's a quote inquiry.

Or that amount for eight, whatever. For eight, exactly, yeah. So the other thing is why I don't, I personally don't want the price on. Because you get other companies, you know, we must not competition.

Yes, yes.

So they see your price. I see, I see. Okay. and then they would go lower. So I was actually quite surprised at the one in this little bit. I just saw by chance that their medicals are like still 300 range, where most people have gone to 350. I don't think anyone in the industry has gone to more than 350, maybe 374, a basic medical. We're just talking about no special tests. So I don't want someone now to like...

see the price and then decide that you know i can beat you you know yes and um but it's also about service delivery and i said that's why it's like yeah it's like all our clients we've had for about eight to ten years okay uh so okay so see the money how it works now on your thing

Honestly. Oh my goodness gracious.

I told you I need to start paying you now for you to do all this stuff. So it's going to look like that. I would like to order the following products. Then that comes up automatically. The food biomedicine guide. That's not just a... That's just...

So it will be written depending on whatever product a person chose. And then how much they... it's say the one eight for eight that will all be included in the message that you receive right so there's also an option to book via email i'm not sure if you saw it right so person can decide by incentive your whatsapp so

let's see the shopping cart you for email then it probably should send you to an email so it opened output yeah so

It's roughly the same idea, so it will open a draft message with your, let me, let's just wait for it to, okay, so it will look something like this, right? The same thing, right? Then, to the email address, yes, right?

Okay.

So now your email address will automatically be put there. Let me just see if this is the correct one.

Yeah, we decided to just keep the email address. It would have been disastrous to change the email address.

Okay, so their email will be here and yours will always be here, right? And then you receive the email like that. Okay, so I talked about SEO. It's also quite important, but I see it as something separate. It's now SEO. It's search engine optimization. So it's just making sure, because it's live, but say I search for hostility wellness on Google, certain websites are going to pop up.

Do you want to be on the first page or on the 10th page?

On the 10th page, yeah, exactly. So it involves adding your website to Google Search Console, right? So Google has its platform where you add your website there so that they index it, right? To be on that. And also you do keyword research. What are people mostly typing when they search about wellness, right? Then you do that keyword research and then you make sure those keywords are baked into your website.

That will help your site rank better. Even better is adding a blog page to your website. That is something you might eventually look into. A what page? A blog. A blog page.

Maybe tips.

Yeah, so basically just writing articles maybe on a certain topic maybe Tips and on how to do certain things. I'm not sure but you know that that can also help your website rank in terms of SEO so Also connecting I saw you have a business profile already and connecting your website to the business profile So Google knows I don't know Yeah, so

Yeah, so... Just review the calendar part again for... to see. The calendar part? Yeah. When people booked and so on. Or can people book online?

Okay. What I mean is, I think I'm just going to show the virtual reality here. So we made one specifically for our virtual reality. So I'm just going to show it as an example. So if I search for virtual reality, let's just say virtual reality Cape Town, right? Right, so... Okay. Okay, let me do this. Okay, so this is our virtual reality website. Right, so it's basically VR entertainment. But we also edit in, what you call this, admin.

Do I remember the password? Let me see on my password manager. The what? The phone email. The app on the... On the phone? Yeah. Okay, I think it will look better there. Because it's a calendar. It has to be. Okay, let me see. Password manager...

Yes, you choose. Oh, yeah.

Yes, that's okay now so this is basically what i mean so you've got booking planner right it has a calendar like this let me just do something like this okay right so you you have a calendar basically that shows for example you've got a booking that's there you can you can click then you'll see details about that booking. So I'm not sure what your question was with regards to the calendar.

- Okay, do you have a question?

- Yeah, this is what it would basically look like. So if you've got, automatically when someone books, The moment you set a date or maybe you give them an option to choose their own date, it will automatically be added to the calendar. So it's not like you have to manually add to the calendar. It will be automatically added to the calendar. And then you will then just have to show that.

Yes, because what I like about that is so that they can see that the climbing can be decide which times to stay better but not that they have full control over what time they want i mean it's gonna be let's say these only bookings between um five and post from say two to six that they can then decide which booking okay in that time slot they want okay so i think if i'm understanding you correctly

So this now is private to us for our, because we don't actually want them to see when we are available and when we're not. We will tell them, like, we'll give them feedback once they see we want this day. But it might be different for you. You might want the people to see immediately which slots you have available. No, no, no. Okay.

It's like this. They can send the booking. Yes. And then we can say to them, okay, this is That slot is not on. That's what I thought.

Yeah. Okay.

Okay.

So it's basically the same implementation as this one.

Yeah. Because with the nature of our work, it's like this coming week, there's basically no work, except on Monday, there's two guys coming. Yeah. And then, okay, I forgot about Wednesday. Okay.

What she does is she writes these things down in the diary and sometimes she forgets to write it in. So what I'm interested in is that on the website people can request the booking. All right? And then it pops up on our side so that we can decide, okay, and acknowledge, okay, Wednesday is good for you this time. Because remember, depending on how many staff members per company, the time slot may vary.

And in particular, if they now request a full medical, say like we had an example where this one company had eight members for medical, five of those had full medical, the other three just basic. So that pops up on the screen. We acknowledge that and give them a time. But our time spent there compared to the guy that has 10 basics is going to be different because we can kill the guy with 10 basics in half an hour where the 5 or the 8 year that has the detailed stuff, the full medical

we can spend up to two hours. So that's just because we must still have control over the calendar and not have people see, okay, there's a blank spot, now I want that. It's just gonna be too much pressure for us.

- So there are a lot of options and solutions to that. So I was thinking, right, You summon books, right? It gets recorded somewhere. You get notified, right? The calendar is checked. All of that happens automatically. But the message that you receive as a notification will inform you if there are probably any clashes on the calendar. You get to see it on the message. It's not like you receive a booking and you're like, okay, is this date right?

You also have to go check on the calendar, you don't have to do that. It can be included in the message that notifies you that are there any clashes or the day is completely free, something like that. So I think that's how we probably have to do.

It's like now, as I said, although we just technically have those two clients, but when Monday comes then suddenly it is like... We can become full for the week. Yeah, one phone call and then it is the whole week. Or we do WhatsApp

most of the time. And then, you know, when is your day available? That's not our old clients who know us. And, you know, I need one medical, you know, when are you available?

Now, so I think I see a conflict between like, Normally, the bookings that you normally get and the ones on the website, whereby someone actually calls you and someone actually books on the website.

Yeah, well, we will refer everybody to the website for bookings.

See, that's what mommy wants.

No. But again, it should be.

It should be because then you only have one source to go to. Yeah, but I would suggest not like to completely like change it now.

Over time, that's how it should be like.

Over time.

I can just let you know that we now have a booking system.

Yes, once all of this is completely...

Sorry, I'm just like... I know we're talking a lot on this thing now, but if it's easier for moms to book out slots even when you are not available, you're feeling tomorrow I ain't doing anybody, you can go there and book it out.

Do not disturb.

Whatever it is, they're not going to know that you, they're not going to see that. But you know that you fill that whole thing yourself.

Yeah, yeah, yeah. Sometimes it's like, You know what really makes me tired is also that, because most of our clients come here, so we actually do the medicals here, most of our clients. But there's also, maybe just half-half, because the others, it's like the excellent group and okay, maybe I think we still get most of the clients coming here. But then you would get a few 8 o'clock, I don't want to do 8 o'clock in the morning, especially during the winter, it's like 9 o'clock or so.

But then from the room you can hear cars pulled up and you can see this Bucky's waiting there and now I'm thinking I'm now awake now. But you know you're probably 5 o'clock. Am I going to open up for you before then or not? So it is, but we always try what is the best for the client. Yes. Not really complaining about that. But now I hear you, we have to move forward. We can start on your phone first.

You can start on using your Google Calendar and see how it works with you.

And then you can learn to do that.

It pops up on the WhatsApp. It pops up on the WhatsApp, the notification, because I know...

No, don't say it's going to help you.

It's actually your duty. It works off WhatsApp a lot.

But for the meantime, I think you also need to know how to add manually... What do you call this? Yeah, to the calendar. So that if it's made via phone call, it didn't go through the website at all. It has to be there on the calendar.

Because sometimes a person can forget.

If I go there, what would it look like on the site if I go there too? Can I just... I want to see something virtual. What is that? Virtual reality. well this is the admin portal though yeah i want to see do do i have an option on the side to to book or yeah yeah you have an option to book an event if you yeah you can you can try that and you see it will pop up here um what am i trying to do i'm trying to figure out what am i okay so they can't see this

They can't see this is the the admin slash like so you have to like login for you to How often do you check your bookings?

How often?

Yeah, we check every day.

No, but you have to check every day. No, I know that because you're not gonna check every day. That's not what I'm asking. Do they check every day? Because you have to check every day, mommy.

Yeah, but she can also as well get a notification. Get the notification.

Yeah, once you get the notification, you're going to look.

Now just check it. She sounds like my mother used to say, yes, I'm the child now.

Okay, today's request.

So here, if I decide, look here, see here by the event date. So I can now decide it is next week, 29th. So then, number of, so I'll say 10 kids to adults. And just see what. We'll get back to you within 24 hours to discuss. So here it's saying already that it's not, that doesn't mean it's booked. That's what I'm getting. This does not mean that it is booked. That means they're going to get back to me.

So the same response can be on your side.

So you don't feel the pressure of I want the 29 that I've already booked and paid and everything is coming. When you have

This booking, the request, you generate an invoice. So that you don't now sit at the end of the month or two days before the end of the month and say, I must send out these invoices. Yeah, it's already generated with the booking.

Yeah, yeah.

That's the problem. Well, it created itself.

Yeah, so I can just click there, right? And then you just click on it, all the details in and they... So, so your details.

What? Whoa. This is what I want to get. This is what I want. So why do we get to Sage? To pay Sage?

So if like this is a deposit that means to be paid you can... Yeah, you see the... Then you can just save it as PDF and send it to clients.

Yeah. So I'm looking for something simple like this.

Yeah. Okay.

So that is less thought process and remembering, oh I must do this, I must do that, I must do that.

It might simulate the... the invoice with the booking.

Yeah, because there's nice you can say that you decide now if it is full payment, if they must pay 25%, 50%, 70%, whatever, if it's due on what date.

Yeah, so you actually add the terms and conditions like the remaining payment should be paid, what, what. Yeah, so yeah.

I like this. Sorry that we're so much in your thing now. I like this. This is what I like.

Yeah, we would do, this is just basically like I said, we're into web design we're into automation as well we automate like workflows yeah yeah so that also includes chatbots so if you see here the corner you've got a chatbot someone can just chat to this and make a booking yeah yeah no no that is fine yeah yeah

Especially with the wellness, not necessarily with occupational health. That's just too demanding. But with wellness, you know, there would be, it would probably be mostly on a Saturday, Friday afternoon, or Thursday afternoons,

maybe three days a week, because everyone won't be available on a Saturday. So, not all right.

We must discuss this

in future or close future near future not too far away but yeah i see invoice temple just automatically did a table order i normally pay them annually okay so it was probably annual But I probably didn't want to continue with it. So it's actually now on my phone. It's actually very easy while driving. I can then just also maybe the same phone. It will be just as easy. So there's like a five.

Yeah, I like that. You generate the invoice with the booking.

And also it's not only invoice. You can toggle between, let me tax invoice and quote. Yeah, yeah And this is the blog I was talking about so you've got a section where you just write articles you got you can see new article and then you start writing and then add your pictures and then you publish it so it automatically gets added to the website that is now if you decide to get into this whole blog thing So yeah

That is it. So yeah, this is now automation. So automation for us, when it comes to website includes this auto-invoice generation chatbot, like support assistant maybe you want 24/7 customer support. So there are two additional things we spoke about. We talked about SEO that is separate from like what we did already. So we talked about SEO optimization, which is your website ranking on Google. And then we spoke about this automation and AI integration, which is that chatbot.

So, yeah. Like you said, we would be willing to discuss more if you guys are interested in any of those.

So yeah. You asked me about my products too. Yes. Because the products go with a holistic lifestyle. Yes. Okay, there are people that I sort of give treatments for those guys with psoriasis and all that. But this is all the products. I do the Induka products. I'm not sure if you know Induka. Oh yeah, I've heard about it. So, with Induka, now this daughter of mine, she has all the types of allergies from a very young age.

And so, it's like the sulfates, carobins, I don't know what all Sarah had. Her hands were Terrible, terrible. So I think you were about how old were you? We were in Cape Town. We were in Cape Town. We were in PE, so. Not in PE, but... PE. We were in PE. Yeah. We did all the research. All the research. So I had to look for shampoo and conditions without parabens and without sulfates. Do you know how difficult it was?

That was probably about, say, almost 20 years ago.

No?

to find even the baby the johnson's baby shampoo the baby shampoo has got parabens and and and and sulfates in and you'll see globally also it's like on the internet you know they go it's like america the worst toothpaste to use is colgate because it's got all this petroleum and this and that and that and that yeah so anyways so um so i joined in nuka because there Our products are not organic. There are some organic ingredients in it, but not, I can't claim that everything is organic, but it is all natural.

And we had a Women's Day, was it three, four years ago, Sarah? And so when everyone left, I think, okay, before that, I bought the stuff for her and it's like the next day the itching was gone and within a week I've got a picture of that so when I do markets to her, she does markets, this is like proof, I've got proof of another lady, she's a type of a hospital and the feet they call it keratosis where there's this deep thickening of the bottom of the foot

And so I decided, look, she's a pensioner and she's been through quite a bit of trauma. I'll go to her and give her all the products free. It's like free that standing there and the foot care. And then what was, but she's over 70, but she said, you know what? I said, "No, man, just let I treat you." And when we were finished with everything, because there's a silk and then there's a scrub, and that scrub is unbelievable, and then there's a cream that you apply afterwards.

And when she stood, she said to me, "You know, there's something different with my feet. It's like I can feel the blood going through the veins again." And so she sent me, I've got it somewhere on my phone, she sent me pictures, I said like every two weeks, two weeks later, wow. Four weeks later, she sends me a voice note, she says to me, sister, my daughter says, mommy, I don't know those feet of yours, because how it is.

And so eventually a son bought a kit for her. I haven't made contact with her for a long time. As I said, her hands looked as though it was burnt wounds. I bought a dishwasher before she got married because two daughters, I was still doing clinical trials then. And so one week it was the one to wash dishes. and the other one to cook and then then it was vice versa so any case she still has the dishwasher when she got married i said that but it was like very bad the other thing too was with that day with them that we had to come to tuition that that lady's day so the nail polish was there so if she used a regular nail polish on the toes

She tastes metal in her mouth. Is that so? Metal in her mouth.

And she tastes all the chemicals, all the things in my mouth.

Just that thing? On her toes. So on that day, we went outside, yeah. So she said, mommy sends the nail polishes here. Let I put on. And then she put it on the fingers. Absolutely nothing. So she allows her daughters to wear the thing too. And so what I say, when I went for my manicure, pedicure, I said to them, I'm done with gel. Because the gel dries out that, isn't this gel, that they call the gel nails?

So my nails grow very fast. So now there's that gap that's open there and I don't want to apply gel on the dick ends. So I said to them, it's a loss. So I took my e-book and I said, it's fine. products just because there's less chemicals and it's all these chemicals that we find in food and in products that cause cancer one of the big things that cause cancer so um but i would somehow talking about this now somehow want to give a description of my products yeah

For me, it is like the perfumes is not a big thing to me. I'm not sure.

If this is added to the product shop, where they could...

Like the description that I gave with all the others we know is at the convention center, just the description that it's all naturalistic.

Okay, so my question is, because now these are two different type of products. You've got these products, and then you've got products like in terms of service. So do you want those mixed up together?

Can we categorize this as a different product?

I think it's best if it is a category of products. Another page maybe. Yes.

Another page. Part of wellness too. On the wellness page.

Separately. I think it would be best if they can add another page tab to the thing and you just have this on its own. The catalogue. The catalogue itself, yeah. Where can we look at You can put the name in the query. I've had it like that before on the previous website. But it took a lot for me to get it all uploaded.

It's stuff that you can just easily upload on your, like the portal that I should use.

Would we be able to do that where I can maybe change if the prices change?

Yeah, that's like the whole purpose of the management portal.

One last question, just for payment portal, does that extra...

Payment. Oh yeah, like as in someone has to pay online.

Yeah.

Okay, yeah, that would be a very separate thing. Because I would have to first implement the interface and then integrate with, what do you call these... payment gateways like your Yoko, those guys that authorize online payments. You have to integrate their service into your website. So that's a separate thing.

I'm just thinking of that mad muscles thing that I did for three months. And I said, "I'm not interested," but you see the thing is that they had my card details. So I wasn't aware that three months later, and I stipulated that I only wanted for the three months. That was now this whole dietary thing, which I never even did at all. So I do realize that three months later, they deducted again, and with the third one,

My bank then advised, called me and said it looks, and sent me a WhatsApp and said it looks like fraudulent activity. And I know that I stipulated, so I was just follow up on those cases because when I went back into the bank statements, I thought, oh my word, I missed that payment. And that was, okay, so the payment wasn't 345 anymore, it was something like 700, 800 grand now. So, I don't know, I don't know.

A person can still give you banking details or they don't give you banking details on such domains?

No, but they pay you.

Oh, they pay you?

Yeah, if they're paying you, as long as...

You're not going to have a debit order or anything like that?

Yeah, it's not going to be that. It's just an instant payment.

They're in control of...

I advise that it is there as an option. So I feel like the more customers have a wide range of options. Someone can only pay If you have their card or maybe they are willing to pay like instantly so allow them to do that if they can.

I feel that way when I'm on a website and it's too much effort for me to.

Yes.

Then I somehow leave this thing and go find another one where it's easier for me to. Yes, where it's easier, exactly. But okay, we can. But we'll see how.

So yeah, I think because of time we can just conclude. Yeah.

Yeah. Yeah.

Yeah. So I don't know feedback from you guys and yeah.

Yeah, I think so. Basically it is like as soon as we know and you know that we can operate from the website to whatever, you must have sent me your banking details too and then so that I could just say that.

The website is live now. Yeah. So You're going to do the calendar thing.

Did you say that is going to be extra to the...

On the SEO part.

No, that is part of the website. Yeah, it's part of the website. The add-ons that I discussed were SEO. Yeah. Putting your website on Google. SEO, yeah. Put your website on Google. And later on, SEO. Oh, E-O.

Search engine. Oh, search engine. Okay. Yeah. Okay. Yeah. Optimization. Okay.

Yeah.

So with you. Like Google, Google is the search engine. So now it's search engine optimized, you're optimizing your website for search engines.

Okay, so that you're not number 30 as you said. Exactly. And so what is the expense to that?

I think we would have to, I will have to like send you details to that. And also probably if you're interested in like what we discussed automation and all that, We can also send more details to the course today.

It's a good looking website. It functions properly. Just edit the spelling. Okay, I will do that. Sometimes when you type in your gesture.

The practical.

The practical, yeah. Okay, okay. You did a good job, Tanasi. Thank you, thank you.

We appreciate your feedback. We appreciate your feedback. We try by all means to especially tailor Our services to heaven are different, right? So the website is unique to you guys. It doesn't have to be general. Where if you like go, you see the same thing all over, it has to be unique to you guys.

So, yeah. So, sorry, so from the admin portal now, there will be things we can do, but there's going to be things that we would have to ask you to do.

to add on if we need yes but what i would prefer is for you to have like full customization of most of the things but like like now we we can't list down

everything that you need sometimes you will know what you need as you use as you use yes so you always communicate with me okay this is what we found out can you make this change that is part of the monthly add-ons that is maintained in your website so that it actually suits your use case.

I just stopped as I said the list of things. If not by tomorrow you will have it on Monday morning.

the list of uh okay okay so i'll just send you through the the invoice yeah okay yeah okay yeah thank you uh any any questions any requests you just she has my number you just reach out because even for you uh have a separate

I like everything that was done.

And they still put Tisha into the swim school.

Yeah, that would work very nicely for her. Especially with the online bookings, she's in the pool most of the time. Oh, okay. You know. Yeah, we'll spread the word. No, she knows, but she knows about it. Yeah, but we'll spread the word.

Oh, yeah, yeah, we would appreciate that. We would appreciate that.

That would be nice if the people needed printing, then we just pop up a first on that engine shirt. I know the engine shirt is great. Yeah, yeah, yeah.

I wonder does Solicube have a website?

So we also take old websites because most websites are old these days. We can transform existing websites to look a bit more modern. Something like that. So even if you have a website, sometimes it hasn't been maintained in a long time. It has stopped generating new leads.

I know before when I was at the school, I told multiple websites from scratch, I must say, what is this thing WordPress? But it's too much too fan consuming that is why i was saying because i had to build it and then um i know it's much different now i mean i'm talking about this is like magic this is gotten to a point where it can like uh make you a wordpress because wordpress is quite different

Because WordPress is dragging and dropping. The one we made for you is on WordPress basis, like a custom website. Because WordPress sort of like doesn't give you full customization. For example, it would have taken me forever. To implement a portal with WordPress because there's a lot of external things that I'll have to install, plugins and all sorts of things. Just write code.

Now that is, I have to do all of that. I don't need to code.

Because mostly templates that they have to draw in.

And plug in this thing and that thing. But it was too much. I think they started doing something. I just left. like that and go back to course over with it. Thank you. These are things that we need to experiment with.

So just to say your virtual reality entertainment. Yes. What do you do with that? Because it looks like

Okay, so it's basically an entertainment. So it's mobile. So mostly when you want to get that experience, you'd go to an arcade. You'd go to, okay, that is now us. Okay, three minutes basically. But I can still explain to you, right? So you normally go to an arcade. Play games in the virtual reality. So we wanted to change the way you access or get the experience. So it's more of like mobile. We come to where you are.

You have a party here, you want the experience. We bring the equipment to the access. So that's just basically what we do.

That's cool. So if I stand on a Haptic Pro PS5, then you can only come on the Pro console. and you have a console just for over-texting.

Yes, we come with experience too. So we mostly target schools because it's also great for learning experiences. For example, you learn about space. It'd be nice to like It feels like you're in space. Yes, to have that experience where you are actually, where it actually feels like you're in space. You learn better and more through that. So there are lots of learning experiences that you can have with that.

Hand-eye coordination is great.

You know kids, they love games, so it's mostly games that they play.

Education.

Thank you so much for your question.

- We will give you prices according to what you need. - I don't know what you would like. - Where are you guys based?

- Flaffington. - Okay, Flaffington. - Right now we have to go to, that's where we brought these. We were booked for a very long time. - Oh, okay. - So we're going to Mokpo tomorrow.

Thank you for coming. Thank you for having us. Thank you for having us.

We appreciate it. As I said, when you send the details, our different people do it. Okay. Your banking details. Okay. Just the amount. Okay.

Thank you. And then the monthly, would you want, like for now, would you want me to... just to pay you on a specific day or would you want to debit?

Well, maybe, probably the first of every month.

Okay, now I can do that. I almost prefer that. I'll tell you why. Our income is not everything. You know, it's like weekly or fortnightly or monthly. And then some people's money comes in just a little bit late. And so with the debit then going off, so it's like now, yesterday, the equipment that we bought that we're still paying off. Bye.

Don't be, I don't be so much, don't be so much. I don't think I'm a class. How long might it take to get there? It's not long. We would have a 26 past. Now I was calculating. I was planning to get up to business. I didn't get to the 5. Because I knew it would be more breaks.

I don't know what to do.

I don't know what to do. I don't know what to do. Hey, what's my duty?

What?

Just the impressed What do you think is better? And now it's about the chair's representation. You know, I think they are teams are named.

I think if she's ever going to change anything, she will get back to you.

- I'm going to be cool. I don't know what to do. I don't think it's cool.

I would present

I don't know how you do it. It's an iPhone. - What is your name?

- I'm Densh Toramano.

- What is your name?

- Ngoka Rikoda. I'm Ngoka Rikoda, but I don't know how to say it in English. But you know, this act, this act of violence against women, they don't allow it. It's not like we're going to let them do it. We're going to let them do it. We record our minutes out, we record our minutes in the city. So, we are learning from the company, we are learning why people don't know how to record their meetings.

It's much easier and we get feedback from them. We are learning from them how to record their meetings.

What will I do with this product?

I think we're going to have to go to the airport. I'm going to take pictures. Pictures, pictures, pictures. I'm going to take pictures. I'm going to take

pictures. They are striking like those ones. Para para ones.

Oh, one has a gun?

Yeah. This one, the one wearing nice. Oh, he has a gun? He was showing him the one with the para.

And then you just pump into him going somewhere. Oh, I'm telling you. I'm telling you.

Not safe here to rob a special Yeah Just pop off You are just busy like Clutching Oh Yeah Other people they get just deluxe. Yeah.

So that one gets here and this one is just, it's nothing.

Yeah, especially him looking at the...

You see how it looks. Yeah. But a good one can just, then you're gone.

I think to avoid confrontation with people and arguments with people is... Yeah, you never know what someone is going to do. Yeah. I think I'm doing it. So basically Azuraia to Pira.

Azuraia to Pira, is that?

Is that. In Georgia, I think I'm going to go to study. Hey, Alcideiro. Hey, Alcideiro. I'm going to make sure that I'm covered.

What will you do?

Our income is passing. It's not consistent. There's a problem in the mining area. Yeah, I hate it when people are talking about the mining area. I think they cut my expenses. I can't live with my in-laws.

Special, at least you can watch it.

I am not going to be a victim of this. I am going to be a victim of this. I am going to be a victim of this. And the COO optimization is

I just opened up, but we are still looking for campaigns. Yeah, but also for the meantime, Google campaign.

Campaign using?

Sponsored. Website. Go down to the middle one.

Oh, right, right. You know, I don't know if I can optimize the changes. But I don't know if I can, like, traffic even on the website. I'm not going to say anything about it. I was telling Boj, I was telling Boj, I want to know what you saw. He knows advertising, but he's IT, why he advertises IT? Thank you. It wasn't

online. It wasn't online. The traffic, probably, they only advertised IT. That means they were not in sector or in the black or something.

The people who are doing this are practical people. Hello. I was one of the first to type. It's funny how people, quite a few of them, say that they know how to type first. But we don't know the time yet, so I'm not sure. I'm not sure. Transcriber? - - I am a journalist, I am a journalist, I am a reporter. - But we should really look into their services. But yeah, but pricing, I think pricing, I don't know what they're going to do now.

I don't know what I'm doing. I don't know what I'm doing. um Hello, yeah, no.

I'm not saying this is part of your job. I'm just saying that you can only do this. You can only do this. I'm going to take a picture of the road.

Yeah. But I don't even know. I'm going to eat bread and then I'll go to sleep. I don't want to drink this. You don't want to? I don't want to talk about the money that I have. I want to ask you to give me a discount. I want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount.

I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount.

I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount.

I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount. I don't want to ask you to give me a discount.

I don't want to ask you to give me a discount.

I don't want to ask you to give me I don't know if it's okay, but...

I think it's a mistake that we didn't complete it.

Oh, it's okay?

It's okay. It's okay. I don't know how many times I've been here.

Six times. I've been here before. I've been here before. I've been here before. Boom.

Blessing. December. I think I'm just about with I think so, yeah, because I'm going to Africa. I'm going to go to the hospital and get a surgery. I'm going to get a surgery and come back. I'm going to the East River. The East River. Six Rathmore Rathmore Road. Ooprey. I'm not drinking. Toshi. Maybe it doesn't appear anymore. I think he ended the call.

Isn't it the same place?

Yeah, which is which is thank you.

Okay.

Cool, okay. Is this space fun?

- Yeah.

- Wi-Fi but make it data.

- Okay, cool. And you can grab some food for us over here and also you can open the cool drinks if you want cool drinks and there's popcorn over there.

Can you please open the cool drinks? Imagine that that actually has popcorn.

Wait, actually, actually.

Okay guys, so have you ever played before?

Yeah.

Yeah.

Yeah.

So like the shooting game where you have to shoot the bottles and then this monkey game where you have to throw grenades.

So it's just you two guys and the others here will try to do it.

Yeah. I don't want that scope.

We went to Joe and Jimmy. Actually we went to Junior. We went to Joe and Jimmy.

You guys have played Guerrilla Tank.

Oh yes, I've loved it. I've watched it on YouTube so much.

Okay, yeah, yeah. This is one of the games that you guys will play today.

Yes! Thank you, George.

Here's some chicken nuggets. Yeah, I think I can one-tap a chicken one.

Chicken nuggets for lunch!

Okay, I might need that right now. Maybe.

Oh!

There you go, guys. Cool. Yeah.

Isn't it just like a straight-up normal VR that we use? - Just like in the Australian game. - Guys, everybody should be thinking that. Like it's just normal. - Guys, everybody should be doing the e-birds. - I'm good. I'm gonna go over there.

Where is the chocolate?

-

Oh, because if they did...

If they did tell you, then of course it looks like you wouldn't be surprised.

Yeah, yeah, yeah. And plus, this is what they made me do. No, no, that's just the number.

Can you help tell them? Yeah, I would. I'm a big math man. Oh, it's all right.

Someone takes a picture of me going like this.

Someone takes a picture of me going like this. So I'm going to start off this one with a shooting game. Yeah! I play Rivals all day today.

I grind it with a grain.

So you'll be shooting. There will be guys coming out of everywhere. So you have to check it out.

This is going to be so fun!

Legend first comes out of nowhere and they're reaching for him. Legend first comes out of nowhere and they're reaching for him. Yeah, we would be cooked.

So if you see a block in front of you, you have to move and dodge it. Physically? Yeah. The only person that needs to buy health is me. You have to take him to the one spot. I'm coming. You have to come in front of me.

If you want to let a horse again, if you want to let the rabbit fool again, you're like asking for the rabbit to run. - Today, my, my, my English is gonna be - - - - - - Thank you.

-

- Okay, I'm not going.

-

- - Okay.

- One minute.

- Brad!

Seven one four.

I'm gonna menu Wait, Remi, did he die? Yeah, I died like a hundred times, so I'm gonna menu Yes, we have to shoot him! Bro, I'm not shooting you! How do you dodge bullets? Question, how do you dodge bullets?

You move yourself away from the bullet!

Okay Now I'm not doing it, I'm doing it I'm talking

- -

You only have one gun.

Yeah. I see you guys. Now you fluky junkies.

- Please stop and stand. This is way better.

I'm cave-gaurding.

I can see a black and white.

I can see a black and white. I'm just spamming. So what do you do? If you see a flocking quantity, you go like this.

Okay guys

Yes.

What? - Know your music.

- What the heck, what was that aim?

So you have to dunk to go.

Guys legs forward so you can dunk.

For better aim you can use one gun. It's better for aim. Oh my god.

I need one gun. This is literally one gun.

You only have one gun.

Yeah, I do.

You only have one gun.

Oh, no.

Now now, it's about to switch the game. Peace out.

Yo, I think I got the cage.

Oh, oh, oh wait, I'm feeling it.

That was a cow.

Oh, what? I think. Okay, I want you to press these.

- Hold up your record. I'm still riding on the kids.

What's your question?

oh my god

What happened?

-

Wait, guys you need to play this game.

Thank you.

button

I'm not like the only one who's not comfortable with my job.

Action! -

Sorry, you have my history book.

If you have a knowledge.

Bye. - Tell me. Please stand.

- So we can change the... Guys, you can't stay in the game. You will be inside together in the game. You might be inside together.

Oh, it's random.

Yeah, it's random. Because they are having a talk with you. But you might interact with the other guys. So you interact with the other guys that you meet.

Oh, it's sick!

So you know how to play the letter game? Put your feet on the ground and you walk like that.

Yeah, this is tiring.

I'm tired. So you have to change to the letter game.

Yeah.

Where are the salt sands? Wait, wait, why are you so real? Stop being so realistic.

- The inside is not skin. -

- Mother, I'm not being honest, we're trying to find each other. Yes, sorry, I didn't mean to.

You're also in one of the churches in the upper room in Judah, because that's not much.

- Just go. I've only watched this game.

Sam?

No.

You need the other guys. I want you to play. I want you to play.

Wait, am I speaking right now?

I want you to climb the tree.

I'm in the training. Yeah, I'm in the training. How do you climb the tree? Excuse me, how do you climb the tree?

I'm trying.

Hello guys!

How do you climb?

You do not mess with an anchor.

So on gorillatic mind, your language, they might ban you if you speak inappropriate, right?

- We climb the trees Three hours.

So do you see a ramp on the tree?

Huh? Do you know around the tree, this ramp?

That surrounds the tree.

Hello? How do you climb a tree? I'm so bad at them. Can I make a choice in this game? Okay, I'll just say I'm live and happy.

Huh?

I'm live and happy, so we can...

I love spam.

- So we're going to set it free. - Okay.

But we need to--

Yes. Oh, neat.

He has a personality.

Oh, yeah, yeah. Please.

Can you see?

No! Yeah, I can see.

You can see?

Yeah.

Just walk. Go parallel to the ground, like this.

Oh, okay. Bro, I just want longer! I just want longer!

Press the button on the elevator. Press them. If it opens, go inside. No, no, no! I need to go below.

I'm the little bripper. Can I get my headset back? Sir, how do you jump again?

Sir, again? You jump like this. Is it wrong?

Yeah, but how do you jump? Very hard.

Yeah, you have to go where... You want to climb that way? Yeah. Okay, let me just do it for you. So, I want us to go this way.

No, here. Okay, okay, okay.

- One more? - Yeah, sure, sure. - Get some more. - It's gonna keep you from bouncing.

I just want to step on the table. How about I...

I just want to go inside the table. I'm staring myself in the eyes right now. Boo! Jackie! Where are you? I'm down here.

So I want you to get inside the elevator. Okay. You can sit there a bit. Oh my god, it's my time now. So you're going to hit the close button. The close button is one. So there are two buttons right on top of each other. The one on the bottom is the close button. Remy, where are you?

Are you still in this game?

No, I'm in the other room. No.

Everyone left me to dance here.

It's going to the seat and then it opens. We said there are two buttons. The one on the bottom is closed, the one on the top is open. *Mumbling* Can we put you in another game where you speak with the black and white piece?

No, we can play the purple game. I can't read.

We can explore other games.

Okay. Who's the red one? Why are you guys all leaving me behind? Bye. Rue, can I spend all your money?

- I'm gonna speak to you again. I'm gonna report you.

Hello!

I want you to report you.

Can we be friends? I want to report you.

Can we be friends?

He was making this gesture.

I will shoot you.

What's that?

Yo! -

Okay, so there was a ramp right? So you follow the ramp going up. Then I saw you were on the top of the ramp right? So you hit the drum like this. Oh, I can't do that. Like this.

Oh, that's cool. So my whole story is just my, just the headset goes.

Okay, so any guys need an assistant?

Okay.

Okay, so you can go into the changing room. Then you can change your outfits. Just look around, there is a changing room. So you can go and change your

outfits.

-

- Okay, but I can change you into another thing. There is an animal, animal, animal, molecule, molecule.

You can talk. Oh, I'm going to talk.

This one. This one?

Yeah. I can't understand.

Oh! - - Don't shake it, does anybody come?

Oh, indeed. I'm going to see a tick.

Where are you now?

Where in the city? I'm in the forest. I'm just playing.

Oh, in the forest.

Wait, why did you guys put me, you put me in like this arcade place? I want to go back to the forest. Oh no, that's a little...

I'm just saying, mom, it's cool, you can go back to... Yeah, you can go back to the... Wait, wait, wait. Don't listen to other guys, right? What they're telling you to do. They might go put you in some way like a maze so you won't be able to come out.

Yeah, I'm not listening to this dude. He says he wants to play mini games. This guy says he wants to play mini games, but I said no thank you.

Yeah, don't follow them.

Hey monkey! Hey monkey! Hey monkey! Hey monkey!

So we have creaks. Are we strong? No.

How do you shoot the things up?

How do you get fire?

Is there a different name?

I don't know.

I can see it.

So it's more like a bomb screen right?

Oh, Mike Anderson running out of seed.

Oh, you see him? Yeah. Oh, is it? Yeah. Oh, sorry.

Someone said the A word.

Report them. Report them then. Oh, report.

Hold on.

- Yeah, you can grab it. You can grab one. Pick someone up and throw them. Where the elevator is. Yo, you go. Pinka. Pinka. Wait, that's the elevator. Yo, Pinka.

Up there, I'll go up there.

Must I go down or up?

So, if you wanna climb, you go... We have a roller coaster.

Oh, down, down, down.

Down? A roller coaster.

Okay. Wait, wait, wait. How do you get up there?

I'm just suggesting you go up there. So that when you're done, it's finished.

Okay. You can go down. What? I'm in the elevator. Oh.

I'm going to stop. Bruh, who just said that? Yeah? Where's someone to the end?

Burp.

Nah, I swear it's people.

Where are we even going? Oh, I can see you again. Alright, alright. Oh, I was going to be there. Oh, yeah.

He was quite strong. Bro, I'm drowning!

I'm drowning! Help me! Help me!

I still went down the climb.

How do you climb the trees?

Oh, right, do that. Let me go to that pole over there.

Okay, so you want a tree?

Uh, no.

If you want to climb the tree, just put your hands around it.

Oh, I'm doing it! And it's the same with the building. What? It's the same with the building.

Which building?

There's a building right there.

Okay, so to climb the building right, you have to move parallel.

So you are moving like this.

So you move up the building.

But it's more difficult than it sounds.

You get the point. But it is a slope. It is a slope.

It's a thick building.

I got you.

How do you jump so fast?

How do you make this rocket go on?

Oh, the elephant thing, how do you jump?

You just put your hands down on the floor and then you lift.

I'm climbing. No!

Hey, bro, you stole mine. Oh, thank you. Just box and head off.

Oh, what is? There's a bit of books to do. Yeah, let's try something new. Bro, some people are just so kind to me.

Yeah.

Bro, someone just left me in the elevator to teleport. Why is it so sick? Take a look, take a look. I'm literally in a room and I decided to sit down. You've got to shoot the coin and then people will throw bombs at you. Do you want to sit? What?

Me?

Yeah, you. Yes, can I sit? Oh!

Do you want to sit?

Yes. Oh, I mean, fine. I made it up.

But you...

You know what she's like?

When you're seated, right?

Yeah, where's the guy that helped me?

He can't get up. Yeah.

But what day? He can't get up. Yeah, I can't really move. You know what? I'm just going to enjoy the ride. If a bomb comes, I'm going to shoot it.

Okay, what happened?

Me.

Yeah.

You can't fall through six feet to an angle in that machine, right? Yeah, you can't fall through. So you want to remove the cherry? Yeah. Wait are we in the city? I'm green. Okay I'm gonna try and jump onto that tree.

You're back in the forest.

There's a green.

I'm in the forest and trying to jump onto that tree.

Sounds of the city *Sounds of the city* *Sounds of the city* *

- I'm out of it. Hey, yeah, oh very

I'm sorry, but the time is almost up. Maybe I'll make an inspection for you. So guys, does anyone want to exchange exercise shoes?

With who?

What's your name? Samuel. So you can try out Gorillaz?

Sure.

You want to? Yeah.

Wait, can Samuel play Gorillaz? Yeah. Oh Sam are you...ok Wait Raphael must I follow the track that goes up or the one that goes straight?

Raphael Raphael Raphael

All right. One of them is all...

Yeah, you see those guys have other equipment and so on.

Oh, my goodness.

Oh, I'm going to check. I'm going to look for it.

Okay, if you like it. - Just go parallel to the ground.

- Oh, I made it!

- I'm gonna get something else.

- Can somebody help me get off this tree?

The clock? What? Does anyone else in the city? Where do you go to find abilities?

The right one, the left one.

Yo, Declan, are you in? Stop, stop. Hello! Yes, hello, how are you?

I'm, I'm, I'm Megaman.

Okay, you can come.

Do you play the sound or do you play the soft song? Um, yes, I am.

Oh, I'm the sound.

We're good, darling. How did you buy that super jump? -

Thank you. - Wait, how did you do that? - It was a good moment.

Jump.

I can smell some sweats.

I can smell some sweats of this thing.

You can smell what? Sweats. Sweats?

Yeah.

What are those?

- Bro, wait, Randy, I thought you could come to the-- - I'm just gonna shoot-- - Go to the T-Stone. - Imagine I break the roof. - Okay, so Sam, you know the main goal--

mode

I think Toronto.

I don't know how to read down here. Which one? Can you go to the main building or the red carpet? No, I'm sitting here. I'm sitting with this guy. - Wait, how'd you do that? - I'm playing with my phone. - I see nobody in there. - Wait, Dex, am I in the forest? - No, I'm in the city. - Okay, I'm going to the condoms.

It's been nice to use Tom Cotton.

- Okay, so guys, it's almost time.

- Freddy, where are you?

- Are you done?

- Huh?

- It's almost time. - It's almost time, I'm just gonna give you about a few, take six or seven, four minutes.

- Yeah, sorry.

- I wanna try it.

- Ah, it's whether it's delicious.

- Yeah, he's birthday boy, yeah. You've been extra sure for the birthday boy. Otherwise.

So I'm going to... Do you like Tans?

Yes.

Formula 1.

Yes.

Tans!

Remy! Remy! Raphel! Remy! Yes, get me out. Guys, can you... Who's purple? Can you... -

Wait, wait.

so to grab this is yeah but i can't see well you can't see yeah yeah that's that's because you're wearing a helmet oh it's because you're seated okay sit down sit down sit down

I love the street.

I'm going to the forest.

yeah I see a big person.

-

- I'm trying to catch a better one. - Let me take the hook.

- Guys! Thank you so much. Thank you. Thank you. Thank you. I'm so professional. Thank you.

Thank you for the food. Cool, guys. I'm devilish, but I just wanted to thank you. Why are you doing this? Okay, that other kid was doing something. Wait, what's the time?

Thank you.

Thank you.

Thank you for having us.

This game is so lovely.

There you go.

- What game did you say was the best?

I like it in here.

Bye.

Isn't this updating?

- Guys, can you just do the shaming for us?

- What were you looking for? This guy is 93...

93 rides. No, no, no, it's not... I just... I'm skeptical about a person with 91 rides. Yeah, I'm quite skeptical about why he has 91 rides for two years. So... Let me just... Looks like he's close.

The basket! The basket!

Okay, why to yes, I know next time I start this one that is almost yeah, thank you.

Okay, thank you. All right. Thank you very much.

Okay. The white Toyota Etios. He's supposed to be close by. Uh... Yeah, the... Can you just leave him in? We're going to give him one kick.

Alright, we are going to start the show.

We are going to start the show. I am a 91 Ride boy. What is your name? My name is Uba.

Ok, so you are a real man.

I am a boy.

I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy.

I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy.

I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy.

I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy. I am a 91 Ride boy.

I don't know what you mean to do with motion. I don't know what I'm doing with motion. I'm going to take a picture of the people who are going to be there. I'm going to take a picture of them. And FNB? I'm going to take a picture of the people who are going to be there. Good evening. Good evening.

The nearest reference in drive I'm going to take a picture of the city and then I'll call you back. FNB.

I should go back to the subway, I thought I could do it.

-

This is the way it is. You can't go in there. You can't go in there. You can't go in there.

Sorry, sorry.

What's the difference?

This is your new to Nathan Beale. This is E-wallet.

This is E-wallet. This is E-wallet. This is E-wallet. you

- Okay, from amount. It is Huh? Huh? Yeah. Ah, she didn't put it in. Yeah, I put a shirt on. One second. Highball, highball, highball, highball, highball.

Can I just take my money, my baby?

Yeah, yeah, you can come. It was your dog. I want to take cash with F&B man on the app. Do you know how to do it? Like, yeah. You want to send yourself an e-wallet.

Yeah, an e-wallet, yeah.

Yes, just go to e-wallet. Yeah. Then I send it to who? Yourself, to your number. Okay, sure. Okay. Send it to your number. Oh, okay, I get it. Okay, yeah.

But, like, press that blue one, the bottom one, so that... You know how to say "do" on the phone?

Yeah, yeah, you do do, yeah.

Yeah, and it's your number. Just come in.

Sure. Oh man, that's really good. Here's the thing. I don't know, man. Oh. Happening. I have this wallet myself, but I don't have a PIN. I don't have a PIN. I have my own number. I have a number here. I have my own number. I have my own number. I have my own number. Why don't you make another picture? FNB. - I don't know what to say. I don't know what to say. I don't know what to say. I don't know what to say.

Pingum de Sega.
